Fixed-weight topology-only controller: fixed components and optimized object
Observation
state -> half-wave
input channels
Fixed-weight SNN
$W = A \cdot \text{type} \cdot \text{scale}$
E/I type, scale, dynamics fixed
Propagation
T_{steps} recurrent
internal passes
Action
fixed spike-count
readout
optimizes
binary A only
Topology-only genetic search
mutates binary A only
all weights remain tied to scale
